PROJECTS

[MusicMart](#)

- Built a responsive e-commerce app for musical instruments featuring user authentication, product listings, and cart/wishlist management.
- Implemented Redux to manage cart, wishlist, and order states efficiently across the app.
- Integrated admin dashboard for managing products, orders, and users securely

[Nexuva](#)

- Developed a CRM app for managing leads, assigning sales agents, and tracking lead progress with custom tags and priorities.
- Integrated stage-wise lead tracking and a real-time commenting system.
- Visualized performance metrics using Chart.js for generating insightful sales reports.

[TaskClue](#)

- Created a collaborative task management system with project-wise task creation, assignment, and status filtering.
- Enabled dynamic filtering of tasks by team, owner, and project for improved clarity.
- Showcased team performance and workload using interactive dashboards and Chart.js reports.

[PixBloom \(building\)](#)

- Smart Photo Management: Upload images, create albums, mark photos as favorites, and share albums with others—all in an intuitive interface.
- Secure Authentication: Integrated Google OAuth for secure and streamlined user login.
- Fully Responsive Design: Optimized for all devices—desktop, tablet, and mobile—for a smooth and consistent user experience.
