ABOUT ME

Aspiring Full Stack Developer with a strong foundation in the MERN stack. Passionate about creating dynamic and responsive web applications. I focus on clean code, performance, and intuitive UI. Completed a structured bootcamp and built several hands-on projects to gain practical experience.

PROJECTS

[MusicMart](#)

- Built a responsive e-commerce app for musical instruments featuring user authentication, product listings, and cart/wishlist management.
- Implemented Redux to manage cart, wishlist, and order states efficiently across the app.
- Integrated admin dashboard for managing products, orders, and users securely

[Nexuva](#)

- Developed a CRM app for managing leads, assigning sales agents, and tracking lead progress with custom tags and priorities.
- Integrated stage-wise lead tracking and a real-time commenting system.
- Visualized performance metrics using Chart.js for generating insightful sales reports.

[TaskClue](#)

- Created a collaborative task management system with project-wise task creation, assignment, and status filtering.
- Enabled dynamic filtering of tasks by team, owner, and project for improved clarity.
- Showcased team performance and workload using interactive dashboards and Chart.js reports.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React, Redux, Bootstrap, Typescript

Backend: Node.js, Express.js

Database: MongoDB, Mongoose
